Education

Kalinga Institute of Industrial Technology

B.Tech in Computer Science and Systems Engineering (CGPA: 7.9)

Jun 2025

Bhubaneswar, India

Lady Anusuya Singhanian Educational Academy

10+2 in Physics, Chemistry and Maths (percentage : 66.2%)

Jun 2021

Kota, Rajasthan

Skills

Languages:	C, C++, Python, Java, C#, JavaScript, SQL
Frameworks & Libraries:	Node.js, Spring, .NET, Flutter, Numpy, Pandas
Tools & Platforms:	Git, Github, VS Code, Eclipse, .NET, Android Studio
Soft Skills:	Time Management, Teamwork, Communication, Problem Solving, Accountability, Resilience

Relevant CourseWork

- Data Structures
- Algorithms
- Database Management Systems
- Operating Systems
- Computer Networks
- Software Engineering

Projects

◦ Action Detection for Sign Language Translation

Developed a real-time sign language action detection system using Python. Utilized OpenCV for camera module access and MediaPipe Holistic for hand gesture detection. Processed gesture data with NumPy and trained an LSTM model for prediction. Employed Matplotlib for visualization of accuracy and performance metrics.

◦ Path Finding Visualizer

Developed a pathfinding visualizer using Python and Pygame, implementing DFS, BFS, Greedy Best-First Search, A*, and Dijkstra's algorithms. Used Prim's algorithm for generating randomized mazes. Focused on efficient algorithm implementation and real-time visualization of search and graph traversal techniques.

◦ Low-Level System Design for Elevator System

Designed and implemented a robust elevator control system using Core Java and Object-Oriented Programming (OOP) principles to efficiently handle multiple floor requests. Developed core functionalities, including request queuing, optimized movement logic, and real-time status tracking. Ensured responsiveness and reliability through structured software design principles.

◦ MD5 Hash Generator

Developed a web-based MD5 hash generator using Flask for the frontend and a custom Python implementation of the MD5 algorithm. Implemented core cryptographic operations, including bitwise transformations, message padding, and hash computation. Designed a supplementary script to generate initial hash values based on prime number square root fractions.

Professional Experience

◦ Virtual Internship:

Product Intern at YHills (Apr-May 2024): Designed low-level system components for product enhancement in a virtual internship.

Additonal Skill Sets

- Competitive Programming: [LeetCode: officialank671]
- Microsoft Office
- AWS Certification

Hobbies and Languages

- Hobbies: Travelling, Cooking, Cricket, Pet Care Enthusiast
- Languages: English, Nepali, Hindi, Maithali, Bhojpuri
